About Us

Bet Lounge is a unique community interaction concept that gamifies Telegram group chats through a custom betting bot. We merge gambling, gaming, and financial management in a private social setting, fostering community building and excitement during live events. Bet Lounge allows you and your group to bet on sports, create custom bet pools, escrow, host tournaments and much more at your fingertips.

How It Works

It all starts with the bot being added to a Telegram group and made admin. Members can then deposit funds to play with directly on the bot, you will get a private deposit address for your account. Load up your account and you're ready to go!

Custom PvP Betting

Group owners can then use the private dm side of the bot to create and organize the bets. The bot will then prompt the owner to create different possible outcomes of the bet. Once bet is created, it will show up in your 'Created Bets' menu. When you want to start the betting process you can then click Activate Bet. You can also stop the betting process by clicking Close Bet.

Get Rewarded

Once the results are in and the outcome is clear, the group owner can then go into the bot and Choose Outcome. Once the outcome is chosen the bot will automatically pay out the winners. Check your balance!

Frequently Asked Questions

Where Can I Find The Bot? +

The bot can be found on telegram, you can search @betloungerpvp_bot or click here: https://t.me/betloungerpvp_bot
